SUSTAINABLE TOURISM

EXPERIENCE

ECOLOGY

AUTHENTICITY

Sustainable stay close to nature

Our place is a renovated country house built with natural, local materials. We operate in the spirit of zero waste - we save water and energy, reduce waste. We have our own unique system for recovering rainwater and so-called gray water, which after treatment we use, for example, to water the garden.

Healthy food from our garden

Fresh vegetables and herbs from the permaculture garden are waiting for you on site. We cook with seasonal, local ingredients - simple, healthy and tasty.

A place of relaxation and creative energy

at the foot of the mountains, you will find unique art installations made of natural and recycled materials in nature. These are spaces for relaxation, meditation or creative work.

Art and Craft Gallery

At the center of our place is an intimate gallery showcasing the work of local artists and craftsmen. All in the spirit of ecology and the idea of zero waste.

Close to the real Andalusia

We are just minutes away from Vélez Rubio, an authentic Andalusian pueblo with old-world charm. We will be happy to show you the local bars, historic streets and most interesting places or local fiestas.

Why it's worth it.

If you are looking for silence, nature and a real experience, away from the crowds - you are in the right place.

It's a stay in the rhythm of slow, with all the comforts, but close to the land and what's important.

Experience yourself, nature, ecology and authentic Andalusia.
